BORN TO PERFORM

20023630 · C · T · ***

NEW

The tracks of the Carrera DIGITAL 124 'Born to Perform' car racing set are perfect for high-speed racing! This is where the cult cars, the Chevrolet Corvette C8.R 'No. 3' and Porsche 911 RSR 'Project 1, No.57', go head-to-head. 2020 was the Corvette C8.R's first opportunity to reveal the immense power under its hood. The Porsche 911 RSR 'Project 1, No.57' is the latest rocket to be launched by the Project 1 motor racing stable and caught the eye and ear at several FIA long-distance races with the roar of over 500 horsepower. These racing cars are such faithfully and detailed reproductions, it's hard to distinguish them from the actual car in the latest racing series. They both demand attention - on the Carrera racecar circuits and in display cases in homes everywhere. The racing circuit set is also equipped with WIRELESS control handsets for maximum freedom of movement around the racing circuit and a double lane-change section for high-speed overtaking.

High-performance DTM duels

The Carrera DIGITAL 132 'DTM Speed Memories' set promises fans of this well-loved racing series a veritable battle of the giants. The head-to-head between the BMW M4 DTM 'B. Spengler, No.7' and Mercedes-AMG C 63 DTM 'P. Wehrlein, No. 94' sees two proven winners in the ultimate struggle for supremacy. Both drivers have already claimed overall victory in the DTM series, but the championship in homes around the world will be decided by the most skillful drivers on their control handsets. The controls are included as standard in the WIRELESS sets and guarantee absolute freedom of movement around the racetrack. The 7.3-metre circuit features long straights and challenging bends to bring out the best in every hobby racer.

Three-country action

The Carrera DIGITAL 132 ‚Spirit of Speed‘ set provides the tools for an international racetrack battle. Three cult cars, the Porsche 911 RSR ‚Pink Pig Design, No.92‘, every man’s fantasy; the Chevrolet Corvette C8.R ‚No.3‘, and the elegant Aston Martin Vantage GT3 ‚Heart of Racing, No.23‘, all face the challenge. These mighty racers are the dreams-on-wheels of automobile manufacturers from three different countries as they speed around an 8-metre Carrera racing circuit. While the Porsche 911 RSR and Aston Martin Vantage GT3 have provided thrills at circuits for several years, the Corvette C8.R first burst onto the blacktop in 2020, claiming numerous long-distance victories in the process. Now it’s seizing its first chance to show just how much power it has under the hood in battles on racetracks in homes around the globe.

PERFORMANCE MEASUREMENT!

THE CARRERA CHECK LANE MAKES IT POSSIBLE!

20030371

**Carrera Check Lane**

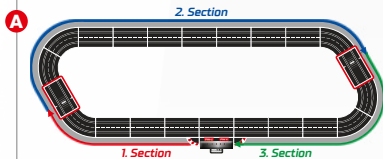

The Carrera track incl. DIGITAL decoder for segment and split time measurement.

A Split TIME MEASUREMENT

The Carrera Check Lane makes it instantly possible for Carrera drivers to measure their intermediary times. Placed at any point, the Carrera Check Lane measures the drivers' intermediate times. Just like in real auto racing, the Carrera drivers instantly have their complete driving behavior on the course under their control.

B ENGINE MEASUREMENT

The acceleration of a Carrera car can be measured precisely, through the installation of several Check Lanes in a row. Thanks to the Carrera Check Lane, not only the final result, but also the driving behavior throughout the entire race counts! (only in connection with Carrera App Connect and the Carrera Race App)

PULL & SPEED®

ENJOY FULL ACTION AND THRILLING CAR RACES

On your marks, get ready, go! Let the race begin ... Full racing action is guaranteed with the cool Pull & Speed racing cars.

A big variety of vehicles will make the heart of any little race driver beat somewhat faster. The strong pull-back engine makes it possible: simply pull the cars back, let them go and in an instant the vehicle takes up the race in full speed. Due to the stable plastic chassis collisions and crashes do not constitute a problem and thus the vehicles are also suitable for children ages 3 and up.

The small and precise replicas, at a scale of 1:43, are in no way inferior to their "big brothers". Due to the original licenses the models fascinate by their perfect scale and detailed execution. Pull & Speed offers great driving fun for all ages as well.

- ★ Vehicles with plastic chassis on a scale of 1:43
- ★ Pullback motor feature
- ★ Forward freewheeling
